SHORT DESCRIPTION

An ambitious student with a strong desire for success and a creative approach to work. I show preseverance and the ability to work in a team, with openness to new ideas and respect for other people's opinions.

WORK EXPERIENCE

Without experience in the IT sector.

PROJECTS

- **Hackathon Project** - **Topic: "Smart Tools"**
  - Participating in a team to develop an application for students to find apartments and roommates. The app allows logging in as a property owner to post ads, or as a student to view ads and find roommates.
  - **Used Technologies: HTML / CSS, MERN Stack (MongoDB, ExpressJS, React, NodeJS)**

- **Book and Comics online shop** - **Bookwave**
  - The Project **Bookwave** is an online bookstore for books and comics, built with React. The application allows listing and filtering books, searching by title or author, as well as searching comics by superhero (Public API). Users can add products to the cart.
  - **Used Technologies: HTML / CSS, React (Hooks, Routes, ContextAPI), JSON**

- **Under Construction - Personalized Fitness Platform - getFit**
  - **getFit** is an innovative application that allows selecting and booking fitness classes, participating in fitness challenges with specific goal., With visual display of exercises by muscle group, and a progress tracker to monitor your achievements.
